

## **Logistics Manager**

**Full-Time Experience:** 4-7 years

We deliver world-class solar and battery projects, backed by robust procurement from India and China. We are scaling rapidly and seeking experts who can manage complex global logistics with precision and ownership. The Logistics Manager will oversee global logistics operations from material dispatch in China and India to project sites in Africa. The ideal candidate will ensure smooth, cost-effective, and timely delivery of all equipment while coordinating with purchase, engineering, and project teams.

### **Your Key Responsibilities:**

- Plan and manage end-to-end logistics from supplier to project site.
- Coordinate shipments from China & India, including freight booking, customs clearance, and insurance.
- Supervise warehousing operations in India; make sure dispatch to Africa is timely.
- Build and maintain relationships with shipping agents, freight forwarders, and customs brokers.
- Track shipment timelines, logistics costs, and KPIs.
- Resolve bottlenecks in transport, documentation, or port handling proactively.
- Align logistics schedules with project timelines in coordination with procurement and project managers.
- Ensure compliance with trade, import/export, and customs regulations.
- Take ownership of assorted day-to-day tasks, including coordination and liaison with suppliers, vendors, and external partners.

### **Our Requirements:**

- Bachelor's degree in Logistics, Supply Chain, or Business.
- 4 to 7 years of experience managing international logistics or project shipping (preferably renewable/EPC sector).
- Deep knowledge of Incoterms, freight, warehousing, and customs processes.
- Strong communication and vendor coordination skills.
- Advanced Excel and familiarity with logistics tracking software.
- Should be open to travelling to ports, warehouses, and project sites for on-ground coordination.

Detail-oriented logistics professionals who can balance efficiency, cost control, and operational smoothness in a global, fast-moving environment are encouraged to apply.

## What We Offer:

- Competitive salary & benefits
- Collaborative & supportive work environment
- Opportunities for career growth & development within the organization
- Be a part of the team that is passionate about making a difference in the renewable energy sector
- Chance to be part of a team that is passionate about making a difference in the Renewable Energy Sector.

## How to Apply:

- You can apply directly through our website or send an email to [gayatrimudgil@jivoenergy.com](mailto:gayatrimudgil@jivoenergy.com) with "Your Name - Your Last/Current Company Name" as the subject line of the email. Please also mention your current CTC and notice period in the email.
